Testing Certification

Klamath County School District certifies it is in compliance with all components, including any and all testing required by any part of the Healthy and Safe School Plan.

Testing Results

Klamath County School District is current with all required testing as of the date of this document. Test results can be found on the Klamath County School District website at the following [LINK](#) under the 'Safety Resources' box. Klamath County School District will also use the district webpage, employee email addresses and individual school newsletters to provide final test results to staff, students, parents of minor students, and other members of their community. This includes providing actual final test results or providing direct access to final test results through links in the communications. Please contact Steve Johnson, KCSD Safety Officer to be added to current district email lists and programs. Specific test results can be found at following locations/links:

- Lead in Water: [LINK](#)
- Radon: [LINK](#)

Website Link Maintenance

Klamath County School District certifies all website links for plan information and test results are current and functional.

Major Exposure Reduction Activities

Klamath County School District developed a Healthy and Safe Schools Plan as per SB 1062 which was implemented in 2019. The plan outlines the plan and timeline for Klamath County School District to test and respond to lead in paint, asbestos, radon, integrated pest management, carbon monoxide, and lead in water. The following is a summary of the Klamath County School District Health and Safe Schools Plan and activities which occurred under the plan during 2023-24 school year.

Water Testing

Beginning with the 2023-24 school year, samples were taken from designated facilities at all sources where students, staff, or the community could retrieve water for drinking. This included all required drinking fountains and sinks. Locations where samples tested at or above the action level of 15 ppb are listed below with associated corrective action taken:

School	School ID	Total facility samples taken	Location/Classroom of samples exceeding limit	Test result <15 ppb	Corrective action
Bonanza Schools	467 & 482	93	Girls bathroom HS bldg	26.5	Removed facet, replaced with new faucet and retested. Result within compliance level

			Girls bathroom HS bldg	27.5	Removed facet, replaced with new faucet and retested. Result within compliance level
Chiloquin Elem	468	52	No positive tests	n/a	n/a
Chiloquin High School	483	53	No positive tests	n/a	n/a
Falcon Heights	4848	30	No positive tests	n/a	n/a
Gearhart	471	15	No positive tests	n/a	n/a
Gilchrist Schools	472 & 484	58	No positive tests	n/a	n/a

Find all of the KCSD most recent lead in water test results at the following [LINK](#).

Asbestos Testing

Every 6-months, KCSD staff checks locations of identified asbestos. Inspections confirm areas have not been disturbed and/or asbestos is still contained. Inspections are logged and results noted. Any concerns or disruption to an area are addressed as per the KCSD Asbestos plan.

Every 3-years, KCSD contracts with a 3rd party to complete comprehensive asbestos inspections and complete any corrective action as necessary across KCSD.

During construction projects, where asbestos is present, a 3rd party is hired to abate/contain/remove/dispose any asbestos.

I certify that the above information is true and accurate to the best of my knowledge.

<i>Steven A. Johnson</i>	KCSD Safety Officer	April 2024
