

Henley Middle School
A community in which learning and enjoyment meet to give everyone opportunities to experience success, responsibility, and growth.

School Wide Goal

We will focus on grow gains for all students regardless of skill level. We will continually interpret all data available in order to provide interventions and strategies which address each student's academic, attendance and social well-being in order to scaffold a seamless transition to high school and beyond.

Health & P.E. Goal

The guiding principles of the health and PE courses are centered in teaching fundamental concepts, practicing skills and promoting habits that enhance health and wellness. Healthy students help build healthy families, relationships, schools and communities.

Language Arts Goals

Students will explore short stories, novels, nonfiction, poetry, and drama while working toward mastery of various processes of communication.

Science Goals

The science department will continue to implement a curriculum that incorporates lecture, lab, and cooperative learning experiences to continue to meet Next Generation Science Standards. This will allow measurable growth on the statewide OAKS science test and the future NGSS test.

Social Studies Goals

The Social Studies Department will challenge students in social science analysis; civic and social responsibility; understanding and analyzing global relationships, and develop students' ability to objectively evaluate historical and contemporary issues. The department will infuse reading, writing, and speaking assessments to meet common core standards across the curriculum.

Math Goals

The math department is committed to helping every student master the Common Core standards needed to ensure a seamless, successful transition to high school mathematics. Our focus this year will be; raising the level of instruction in geometry in 7th Pre-Algebra to reflect more rigorous CCSS standards and raising the level of instruction in Linear Equations and Functions in 8th Algebra and Geometry. We will continue to work closely as a team to plan quality instruction, and communicate expectations and progress clearly and regularly to parents and students.

Special Education Department

The SPED department will develop strong communication with staff, parents, and students to implement the services and meet the goals on the iep. We will continue to be an advocate that promotes a close working relationship to support student growth.

Music Goals

Students will develop, express and experience the creative process by presenting, and/or performing works of art. Focus will be on learning the language of music and the essential elements and principals of the discipline.
